Coltre Modular Sofa Modules

"The name Coltre comes from the Italian word for 'blanket' and also the idea of a blanket of snow — a soft layer that settles gently over what lies beneath, defining rather than concealing it. We were interested in translating that sensation into something both tactile and architectural. The repeated quilted lines create rhythm and continuity across the modules, reinforcing the sculptural clarity of the form while allowing softness to remain the dominant gesture."

Country of Production	Poland
Description	Named after the Italian word "Coltre", meaning blanket, the design refers to a soft, padded layer resting gently over a defined surface. A quilted textile top drapes over a structured wood frame, where parallel stitched lines create rhythm and puffed volume across the sofa and its configurations. The side profile reads like a precise slice through layered tiers, revealing its architectural character and sculptural depth. Each module can stand alone or be combined into composed, flexible arrangements, allowing configurations that range from simple compositions to more expansive layouts.
Material	The frame is made from FSC™-certified (FSC-CO28824) wood and is fitted with metal springs to ensure seating comfort. A foam shell, lined with non-woven fabric, is stapled to the wooden frame. A fabric cover that encloses the entire module is removable and can be replaced if needed or refitted with zippers. It is tightly fit around the frame and has a quilted top layer on the seating surface that is softer and lived-in. The wadded filling within the quilted top layer is fixed and cannot be separated. The modules stand on legs made from FSC™-certified (FSC-CO28824) beech. Each module is equipped with two pre-installed flat steel connectors, allowing modules to be securely joined around the wooden legs.
Cleaning & Care	The quilted top layer should be regularly fluffed to maintain its soft, wrinkly appearance. After refitting the cover or through regular use, creases or uneven areas may appear on the lower, tightly fitted cover and can be smoothed out by hand. For fabric-specific care and maintenance, it is advised to consult the guidelines provided by the respective textile supplier, as cleaning methods may vary.
